Celebration of Wesak

Content..... It is with great pleasure for me and fills myself with joy to know that a celebration so important not only for us Buddhists but also for the whole humanity , as Vesak, gets commemorated and spread and arrives to countries so humble and faraway as ours, Uruguay, where the practices and teachings of the Master Gautama Buda, have been known from not so long time ago.

When I say humble country talking about Uruguay, I rather remark , that with the grace of not having great calamities as other countries have had and sufferings, as natural cataclysms , sicknesses, wars. But not free of the suffering that is common to every sensible being, that no one is free of. From there the great importance of the slow but constant arriving possibilities of getting to know the wonderful legacy that has been left by our dear Buda Gautama, and that the Masters of Transmission have kept alive . Legacy that today more than ever, we need to learn, to put in practice and let others know for to be aware that even under the world prevailing materialist, the crisis of spiritual values, the spiritual emptiness, the psychological suffering and the violence, each and all of us have the beautiful jewel of the liberation, the only richness worthy of value. We are all responsible to discover it, and give it the brightness it deserves.

We congratulate and thank the Vesak Celebration and hope the saint road of the Buda arrives to every corner of the world, to alleviate all the suffering beings and restore the harmony of all the countries in the world.
